

# Curriculum Intent, Implementation and Impact 2019-20

Subject GCSE DANCE (AQA)

Year group: 10

Periods per fortnight: 6

## INTENT:

The dance students will be focusing on the three core areas of the exam syllabus; Performance, Choreography and appreciation.

Students will work on understanding and appreciating the six professional works

Students will complete two solo technical studies, a duet/trio and a choreography task set by the board.

Students will study dance by 'doing' and the study of the anthology will both broaden their knowledge and understanding of dance and ability to critically appraise dances of different styles and cultural influences.

Curiosity through the dances explored, striving to perform with confidence, ambitious in improving quality of performance and respectful in approach to the differing styles and dances explored.

E learning is available for students who wish to challenge themselves further outside of the classroom – workshops to support the technical studies and professional works will be available during the year. See Ms Curness for details.

## IMPACT:

By having the video assessments both spaced out and organised separately the dancers should have time to work through each piece methodically and focus on the criteria for each dance.

Students will increase their ambition as they use this time to reflect and review and realise that by breaking the course into the clear areas they have the ability to achieve.

Breaking down the 6 professional works into learning groups will allow students to develop the confidence to discuss and evaluate the aspects of performance and choreography seen throughout.

By having a strong rehearsal ethic encouraged through classwork and through continuous homework students should be able to develop the resilience they need to produce the 4 exam dances in year 11.
