

Maths exam support

Student's revision

This should consist of these elements:

Past Exam Papers: A mock exam is scheduled to take place in March 2013. For entries prior to this date mock exams will be completed in a combination of class work and homework. It is imperative that students work through these thoroughly. Additional questions from past papers are available in the Maths area of the VLE.

Mymaths.co.uk: This website contains help and support for students on all aspects of the course. As a guide, students should be working on at least two topics from the booster pack each week ensuring that they get a “green light” on each. They then can go through them again with an aim of achieving 100% on each.

Revision guides: We recommend revision guides published by Collins for students to use.

Supporting your child: Useful things to do with your child include reviewing their revision progress on mymaths.co.uk. We have also included a “Key Concepts” sheet containing maths facts that can be used as a discussion point with your child during a coffee break.

Useful websites:

Key Websites – Use these to support your revision.

Maths VLE:

As well as past papers mentioned above the Maths section of the VLE contains virtual versions of the text books we use in class as well as GCSE unit Check lists. .

NOTE: If your child says that they have no maths to complete, this will not be true. They can always work on the next exam paper or practice on mymaths.co.uk.
